<i>Foreword</i>	ix
<i>Preface</i>	x
<i>Biographies</i>	xi
1 Best value in construction	1
John Kelly, Roy Morledge and Sara Wilkinson	
1.1 Introduction	1
1.2 Building the value case	4
1.3 Briefing	5
1.4 Benchmarking	5
1.5 Value management	5
1.6 Risk management	6
1.7 Building project price forecasting	6
1.8 Life-cycle/whole-life costing	7
1.9 Environmental management	7
1.10 Procurement strategies	7
1.11 Supply chain management: a construction industry perspective	8
1.12 The management of a project	9
1.13 Facilities management: assessing the strategic value	9
1.14 Post-occupancy evaluation	10
1.15 Sustainable building maintenance: challenges for property managers	11
References	11
2 Building the business value case	12
Steven Male	
2.1 Introduction	12
2.2 Client requirements and the client value system	14
2.3 Client value system	15
2.4 The client value system and portfolios of projects and single projects	19
2.5 The project value chain	20

2.6	Portfolios of project: the value thread and the impact of lean construction thinking	23
2.7	Single projects – the impact of paradigms and perspectives on the value thread and multi-value system	25
2.8	Procurement and the project value chain	28
2.9	Creating value opportunities: value management (VM) and value engineering (VE)	34
2.10	Conclusions	36
	References	37
3	Construction project briefing/architectural programming	38
	John Kelly and Donna Duerk	
3.1	Introduction	38
3.2	Definition of briefing	38
3.3	Current briefing practice	39
3.4	Hazards associated with poor decision-making	39
3.5	Characteristic hazards in briefing	40
3.6	Improvements to the briefing process	42
3.7	The parties involved in the briefing process	42
3.8	The project goals	43
3.9	The client's value system – <i>a parti</i>	45
3.10	Briefing issues	45
3.11	To investigate or facilitate?	47
3.12	A structured approach to strategic briefing	47
3.13	The client's value system	51
3.14	The definition of project mission or goals	51
3.15	The decision to build	52
3.16	An example of strategic project briefing	52
3.17	A structure approach to project briefing: description and example	54
3.18	Flowcharting and space identification	55
3.19	Adjacency	56
3.20	Performance specification of space	57
3.21	Characteristic of the final document	58
	References	58
4	Benchmarking	59
	David Eaton	
4.1	Introduction	59
4.2	Benchmarking – helping yourself to be better	59
4.3	The origins	61
4.4	Benchmarking: a definition	62
4.5	Prerequisites of benchmarking	63
4.6	Benchmarking processes	63

4.7	Appropriate benchmarking techniques	65
4.8	Benchmarking methodology	66
4.9	The uses of benchmarking: performance measurement	67
4.10	Responses to the benchmarking process	71
4.11	Benefits of benchmarking	71
4.12	Implications of benchmarking	72
4.13	Benchmarking case study	72
4.14	Other current research initiatives	75
4.15	Conclusions	75
	References	76
5	Value management	77
	John Kelly and Steven Male	
5.1	Introduction	77
5.2	The development of value management	77
5.3	An outline of value management	79
5.4	The lever of quality	81
5.5	The international benchmarking of value management	81
5.6	The VM process in detail	83
5.7	Workshop types	87
5.8	Example	94
5.9	Conclusion	98
	References	99
6	Risk management	100
	Nigel Smith	
6.1	Introduction	100
6.2	Risk management over the project life cycle	101
6.3	Design and construction	107
6.4	Operation and maintenance	109
6.5	The case study	109
6.6	Risk management guidance	114
6.7	Conclusion	115
7	Building project price forecasting	116
	Chris Fortune and David Weight	
7.1	Introduction	116
7.2	The process of building project price forecasting	117
7.3	Identification of potential models in use	120
7.4	Emergent issues	121
7.5	Case study - Live Options software	123
7.6	The way forward	127
	References	128

8	Life-cycle/whole-life costing	129
	Christine Pasquire and Lisa Swaffield	
8.1	Introduction	129
8.2	Key concepts	131
8.3	Techniques available for LCC/WLC	132
8.4	Barriers to successful implementation of LCC/WLC techniques	136
8.5	LCC/WLC for PFI projects	139
8.6	Research and the future	147
8.7	Value for money	149
	References	151
9	Environmental management	152
	Jon Robinson	
9.1	Introduction	152
9.2	Issues	154
9.3	Resources, waste and recycling	156
9.4	Pollution and hazardous materials and substances	158
9.5	Internal environment of buildings	159
9.6	Planning, land use and conservation, including heritage	162
9.7	Case study	164
9.8	Conclusion	169
9.9	Acknowledgements	170
	References	170
10	Procurement strategies	172
	Roy Morledge	
10.1	Introduction	172
10.2	Procurement strategy	172
10.3	Client risk in construction projects	175
10.4	Selecting a procurement strategy	177
10.5	Procurement strategy selection checklists	181
10.6	Procurement options	185
10.7	Constructing improvement in procurement strategy	194
10.8	Case studies	198
10.9	Conclusion	200
	References	200
11	Supply chain management	201
	Norman Fisher and Roy Morledge	
11.1	An introduction	201
11.2	Some general definitions	202
11.3	Background and overview	203
11.4	Supply chain management and construction	204

11.5	Construction – supply chain management and partnering	209
11.6	Established procurement systems and supply chain management	213
11.7	A case study – supply chain management and the construction process	215
11.8	Conclusion	218
	References	219
12	The management of a project	222
	Margaret Greenwood	
12.1	Introduction	222
12.2	The project plan and the implementation policy	223
12.3	Setting up the project and mobilising resources	224
12.4	Managing the project – an overview	227
12.5	Specific aspects of managing the project	228
12.6	Quality control overview	234
12.7	Change control overview	235
12.8	Commissioning	237
12.9	Occupation and take-over	237
12.10	Conclusion	238
	References	238
13	Facilities management	240
	John Hinks	
13.1	Introduction	240
13.2	Contemporary approaches to assessing FM performance	241
13.3	Issues in contemporary FM performance assessment	242
13.4	Assessing the integrative nature of FM performance	245
13.5	Defining FM and the nature of its contribution	248
13.6	Issues for benchmarking FM performance	250
13.7	The complexity of measuring the usefulness of FM	250
13.8	Moving from measuring FM outputs to evaluating business outcomes	252
13.9	The challenge of attuning FM evaluation to changing business circumstances	256
13.10	Conclusion	258
	References	259
14	Post-occupancy evaluation (POE)	261
	Danny Shiem-Shin Then	
14.1	Introduction	261

14.2	The building procurement process and POE	262
14.3	Developments in POE techniques and research	264
14.4	POE and building performance	265
14.5	Developments in POE methodology	269
14.6	POE process models	272
14.7	Applications of POE	275
14.8	Conclusions	277
	References	278
15	Sustainable building maintenance	280
	Keith Jones	
15.1	Introduction	280
15.2	The theoretical basis for maintenance and refurbishment	280
15.3	Maintenance and refurbishment strategy	283
15.4	The role of maintenance and refurbishment within an organisation	285
15.5	Performance measures for buildings in use	286
15.6	Approaches to maintenance and refurbishment works	288
15.7	Procuring maintenance and refurbishment works	289
15.8	Maintenance and refurbishment costs	292
15.9	Monitoring and performance evaluation	293
15.10	Maintenance planning	293
15.11	The challenges facing maintenance and refurbishment professionals	295
15.12	A sustainable built environment	296
15.13	Sustainability and foresight	297
15.14	Housing and construction need	297
15.15	Whole-life thinking	298
15.16	New technologies and improved processes	299
15.17	Conclusion	299
